Announcements

Department of Energy

The DOE is announcing a Notice of Intent to issue -Funding Opportunity Announcement for "Support of the Hydrogen Shot and a University Research Consortium on Grid Resilience." DOE goals will be advanced through RD&D efforts in several areas, including advanced pathways for solar-based hydrogen fuel production; technologies for high-resolution hydrogen sensing; demonstrations of materials-based hydrogen storage and transport systems; and development of high-performance, durable, low-cost fuel cell components for medium- and heavy-duty vehicles. EERE is compiling a Teaming Partner List to facilitate the widest possible national participation in the formation of applicant teams for this potential FOA. The list allows organizations who may wish to participate in an application to express their interest to other potential applicants and to explore potential partners.
