Announcements

Research Communications Initiative Program

This initiative is for the purpose of disseminating research communicationeligible work. Undergraduate students, graduate students, postdoctoral fellows, and researchers at any level are encouraged to apply. The program is open to students and faculty of all disciplines and interested in any aspect of research communication. The deadline for applications is April 15, 2023, and successful proposals will be awarded funds to support the development and dissemination of research communication projects. To submit a proposal, please visit the Research Communications Initiative Program page on the Office of the Vice President for Research and Innovation website.

The University of Oregon has developed guidance on the preparation of data management plans relevant to sharing research data, including the use of persistent digital identifiers (PDIs). The National Science Foundation (NSF) Division of Materials Research (DMR) just issued a Dear Colleague Letter (DCL) to provide an overview of the NSF’s Discoverable and Citable (Data Sharing) program that provides support for junior faculty to integrate their education strategies and research activities. The program targets early-career faculty who are developing research projects and have a commitment to integrating their educational activities with their research. The deadline for applications is April 15, 2023. For more information, please visit the DCL page on the NSF website.

Limited/Internally Coordinated Submissions

Dear Colleague Letter: Incorporating Human Behavior in Epidemiological Models

The National Science Foundation (NSF) Division of Infectious Diseases and Pathogens for Food and the Environment (IDP) has issued a Dear Colleague Letter to encourage investigators to consider funding proposals that address the incorporation of human behavior in epidemiological models. The letter emphasizes the importance of understanding the role of human behavior in the spread of infectious diseases and the potential for interventions that target human behavior to mitigate the impact of these diseases. The deadline for submissions is April 15, 2023. For more information, please visit the IDP website.

Limited/Externally Coordinated Submissions

Spencer Foundation • Research Grants on Education – Large

The Spencer Foundation has issued a Notice of Special Interest (NOSI) to encourage applications for its Research Grants on Education – Large program. The program supports research on education issues that have the potential to affect the lives of large numbers of students. The deadline for applications is May 15, 2023. For more information, please visit the Spencer Foundation website.

Limited/Internally Coordinated Submissions

NSF Early CAREER Award Program

The National Science Foundation (NSF) has issued a Notice of Intent to Submit for the NSF Early CAREER Award Program. The program is designed to support junior faculty who are beginning their independent research careers. The program provides support for research, teaching, and community outreach. The deadline for submissions is April 21, 2023. For more information, please visit the NSF website.

Limited/Internally Coordinated Submissions

William T. Grant Scholars Program (Early Career)

The William T. Grant Foundation has issued a Notice of Intent to Submit for its William T. Grant Scholars Program (Early Career). The program supports early-career faculty who are conducting research on education issues. The deadline for submissions is April 18, 2023. For more information, please visit the William T. Grant Foundation website.

Curated Pivot Searches

The Office of the Vice President for Research and Innovation has issued a Call for Proposals for the M.J. Murdock Charitable Trust’s Murdock Commercialization Initiative Program. The program supports the commercialization of scientific research at the University of Oregon. The deadline for submissions is March 15, 2023. For more information, please visit the M.J. Murdock Charitable Trust website.
