Announcements

DARPA Forward – Advancing the Horizons of National Security

DARPA Forward is a new funding initiative designed to support fundamental research and early-stage development of cutting-edge technologies that could be used to address national security challenges. This approach aims to accelerate technology development and deployment, enabling the rapid innovation of new capabilities.

(06/13) Medical Research Foundation Extends Awards Deadline

The Medical Research Foundation at the Oregon Health & Science University (OHSU) has extended the deadline for its annual Honors and Awards competition. The competition recognizes outstanding research achievements and contributions to the field of medical research.

Limited/Internally Coordinated Submissions

National Grid for the Humanities

The National Grid for the Humanities is a collaborative, interdisciplinary initiative focused on harnessing the power of digital humanities to advance research, teaching, and learning in the humanities. The program supports a range of projects and initiatives designed to foster innovation and collaboration in the humanities.

Featured External Opportunities

American Educational Research Association

The American Educational Research Association (AERA) is a leading organization dedicated to advancing the use of research in education policy, practice, and professional development. The organization offers a variety of funding opportunities and resources to support educational research.

Hons and Awards

American Physical Society

The American Physical Society (APS) is a national professional organization for physicists and related scientists. The organization offers a range of awards and honors to recognize outstanding contributions to the field of physics.

Curated Pivot Searches

Pivot is a leading platform for identifying and accessing funding opportunities. The Pivot platform provides a variety of search tools and resources to help researchers identify and access funding opportunities that align with their research interests and goals.

For more information, please visit the Pivot website: https://www.pivot.org/

If you have any questions or need assistance with finding funding opportunities, please contact Research Development Services at rds@uoregon.edu or 541-346-8308.

RDS is the University of Oregon’s central resource for identifying and accessing funding opportunities. We provide comprehensive support to Oregon researchers and staff, including assistance with proposal development, budget preparation, and compliance considerations. Our team helps researchers identify funding opportunities, develop strong and effective proposals, and navigate the complexities of grant administration.

RDS is a service provided by the Office of the Vice President for Research and Innovation. We are committed to supporting the research mission of the University of Oregon and helping our community achieve its full potential.
